EDUCATION

COR JESU COLLEGE – CJC

BS Information Technology
2023 - Present

Digos City
2023

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Frontend & Backend, Database Systems, Web & Mobile Development

FULL-STACK WEB DEVELOPMENT BOOTCAMP

Intensive program in the MERN stack (MongoDB, Express, React, Node.js)

Remote, Digos City
2023

WORK EXPERIENCE

NAVY SHARKS (Remote)

Backend & DevOps Enginner (Contract)

Australia

July 2026 – Present

- Partnered directly with an Australian client to architect the backend infrastructure and database schema for an elite lifestyle concierge & club platform
- Engineered scalable RESTful APIs and optimized database queries to ensure high throughput, low latency and secure data processing
- Manage DevOps workflows, CI/CD deployment pipelines, and server environment setup for high availability and seamless international accessibility

INDEPENDENT SOFTWARE DEVELOPER

Full Stack Developer & Freelancer

Digos City, Davao Del Sur

Feb 202 – Dec 2025

- Spearheaded end-to-end design, development, and deployment of web applications for clients using Laravel, React, TypeScript, Flutter, and Tailwind CSS
- Built real-time communication modules and WebSocket integrations using Laravel Reverb / Pusher, enhancing system responsiveness for collaborative workflows
- Designed and optimized MySQL/PostgreSQL/MongoDB database schemas, ensuring data integrity, security, and fast query execution

PROJECTS

REMINDA - AI POWERED SMART SCHEDULE ASSISTANT (Mobile App)

2026 - Present

- Built a Flutter & Dart mobile app that uses On-Device Neural Vision (Google ML Kit) and Gemini AI to parse timetable screenshots into automated reminders.
- Implemented offline spatial OCR parsing, Firebase cloud sync, exact Android background alarms, and multi-sector schedule profile management.

CHAINBUDGET - BLOCKCHAIN BUDGET MANAGEMENT SYSTEM

2025 - Present

- Architected an immutable budget tracking platform using Polygon Amoy smart contracts and Expressjs to ensure financial transparency across organizational departments.
- Designed accessible UI dashboard and secure transaction logging, preventing unauthorized fund manipulation.

4PS-NEXUS – GovTech Blockchain Disbursement Platform

2025

- Developed a transparent government subsidy disbursement app powered by Stellar blockchain to eliminate intermediary delays and enforce auditability.
- Implemented automated smart contract distribution logic and real-time transaction monitoring

ACTIVITIES & RECOGNITIONS

COR JESU COLLEGE TECJ COMMUNITY

Student Developer & Tech Mentor

Digos City

Aug 2024 – May 2025

- Mentored junior IT students in Git, GitHub workflows, full-stack web development, and debugging best practices.
- Participated in regional hackathons and tech seminars, rapidly prototyping innovative software solutions under high-pressure conditions.

ADDITIONAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Dart, PHP (Laravel), Flutter, Node.js, Express.js, React, Python, HTML5, CSS3, Tailwind CSS
- **Databases & DevOps:** PostgreSQL, MySQL, MongoDB, Firebase, Docker, Git, GitHub Actions, Vercel, REST APIs, WebSockets, Google ML Kit Certifications:
- Rust School x H.E.R. DAO (Systems, Web3 & Networking)
- Base Certificate (Web3 & Blockchain)
- Cisco Network Defense & Cybersecurity Certifications Languages: English (Fluent), Filipino (Native)
